

Why Choose **MOBILE** **EDGE**

For Your Remote Starter Installation

1. Over 20 years experience.
2. State-of-the-art computer software to assist while installing in even the newest of vehicles
3. We continuously evaluate our products to assure that they are the very best available in the industry.
4. Each and every connection will be soldered. We do not use butt connectors or crimp connectors for attaching your wires together. Our connections are actually stronger than the wire itself. Most other dealers, while able to install it faster, use crimp connectors which will cause all sorts of problems if they fall apart.
5. 100 year warranty on the remote starter unit.
6. 100 year warranty on the installation.
7. Our remote starters deliver the range that is promised.
8. Mobile Edge is the leader in remote car starters in Eastern PA. We install more remote car starters than any other store in Eastern PA (yes, including the big chain stores).
9. We take our time with your vehicle. When scheduling your job, we require that you can leave it for the entire day. This is the only way that we can offer you the commitment to quality that has made us one of the most respected installation facilities in the country.
10. All of our remote starters have a Tachometer sensing wire connection. This means that our Remote Starters know when your car is running and when it is not. If your car does not start the first time, ours will try up to 5 more times. Cheaper, lesser quality brands try once and assume your car is started.
11. Three separate safety cutoffs are installed on every job: A hood switch to protect you and your mechanic, a brake switch, and an emergency override switch.
12. We offer a wide variety of models starting with a basic remote starter and ending with a full featured alarm and remote starter package.
13. Some vehicles today come with security measures that prevent the vehicle from starting unless the key is in the ignition. We stock all the modules needed to allow a remote starter to function properly in these vehicles.
14. We will treat you and your vehicle as we would like to be treated. Your purchase may not make one bit of difference to a large chain store, but it makes all the difference to us.

More Than Just Great Car Audio
